General Description

Ready-to-use molecular grade dNTP solution for use in DNA polymerization, DNA labelling and sequencing processes.

Features

High purity: >99% by HPLC.
Supplied in solution at pH 7.0-7.5

Storage Conditions

dNTPs are stable at –20°C in a constant temperature freezer. Avoid multiple freeze/thawing. For long-term usage, aliquoting is recommended.

Quality control

Functionally tested with thermostable polymerases and for contaminating activities with no trace of endonuclease activity, nicking activity, or exonuclease activity

Store at –20°C For in-vitro laboratory use only
